DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 2, 4-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Aoki et al.

Aoki et al., discloses a pressure sensor (element 100) including a semiconductor device, bonding wires (elements 6) terminals (elements 4) connected to the semiconductor and a housing for accommodating these units. A fluorine-based adhesive seals the terminal and the housing (see, for example, col. 4, line 18).

Regarding claim 4, fluorine is almost always perfluoro polymer resin when is used as sealing resin (see col. 6, line 68).

Regarding claim 5, one of the protective members (either 7a or 7b) can be considered as working fluid (see col. 8, line 40).

4. Claims 1,3 and 6 are allowed over the prior art of the record.

Response to Amendment

5. Applicant's amendment and arguments filed 1/29/05 have been fully considered but they are moot in view of the new ground of rejection.
6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Max H. Noori whose telephone number is (571) 272-2185. The examiner can normally be reached on Tuesday-Friday from 8:00 AM to 6:00 PM.
